

Run TypeScript using ts-node

<https://riptutorial.com/typescript/example/28089/running-typescript-using-ts-node>

1 – Install TS NODE globally

```
npm install -g ts-node
```

2 – Run your TS

```
ts-node main.ts
```

3 – IT WORKS !

Your project must have the **tsconfig.json** file with the good configuration :
